Instructor: Prof. Dr. S. Schumann
Tutors: Dr. E. Bothmann, M. Knobbe

1 Laplace Equation

1.1 Iterator methods

Figure 1: Number of steps until convergence concerning the Laplace error $\max \epsilon < 1 \times 10^{-3}$.

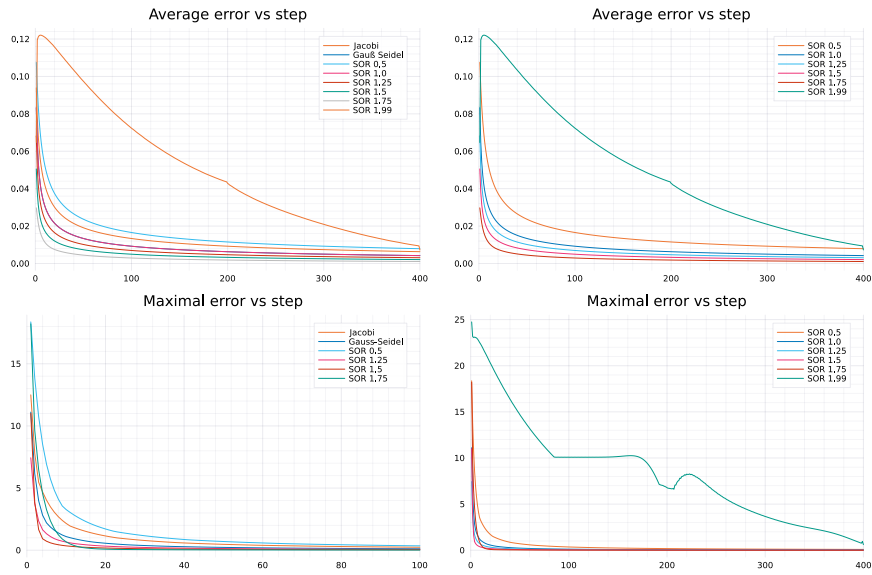

Figure 2: Maximal and average error for different iteration methods.

1.2 Infinite sum solution

Figure 3: Results for the "infinite" sum solution to the Laplace equation for different numbers of terms n .

(a) Comparison of the infinite sum solution with 1000 terms and the Gauß Seidel iterator solution.

(b) Difference between the infinite sum solution with 1000 terms and the Gauß Seidel iterator solution.

2 Diffusion

3 Solitons
